PROFILE

I'm Yarick, a software developer with a thirst for knowledge. I would describe myself as being detail- and result-oriented with a hands-on mindset for development. Broadening my knowledge of IT, optimization and finding creative solutions to a problem are my main professional drives. I consider myself a team player, though I'm capable of working independently, a quick and motivated learner and above all passionate about code.

EXPERIENCE

Project Sokoban-g85

Game developed with a team of students in Java with a JavaFX UI.
https://github.com/barsicle/sokoban-g85
